

I would like to express my concern over the possible LPFM translators taking priority over the current FM translator service. I listen to the local Air1 station which brings me music I like and a message that is beneficial to all. I can go anywhere there is a translator in the US and get this station. Many peoples lives have been changed because of this station. Turning people from drugs, crime, and a host of other examples to a productive life. I do not like to listen to the local stations because frankly there is a lot of trash out there. This station serves the public interest by promoting clean positive programing and changing peoples lives as a result. It would be a public disservice if Air1 were forced off the air in many markets by the change. Keep Air1 on the air with the FM translators.

Thank you,
Kevin Rose
